## Bowranda Arched Roof

The dream lifestyle in New Zealand is to enjoy the weather and the outdoors when you want to. Unfortunately the weather intervenes at times making this impossible. That is up until now.

With the Unique Bowranda you create another room outdoors. Existing decks, patio and barbeque areas or existing recesses are a wonderful place to start and add value to not only your lifestyle but the investment in your home.

The Bowranda can be installed as a roof only or the finishing touches added with Roller blinds in acrylic awning fabric, sunscreen mesh fabric or clear or tinted PVC providing the protection that you require from sun, wind, rain and UV.

The advantage that the Bowranda has over other forms of sun shading is that as a permanent structure it is not dependent on the weather as to its use. If the wind blows you can still enjoy the outdoors sealing off the prevailing wind by lowering the appropriate blind.

- The Bowranda patio roof is constructed of powder coated 50mm aluminium and stainless steel fixings to ensure it will withstand coastal conditions
- Its roof is a highly specialized membrane that eliminates 99% of UV whilst maintaining ambient light. This is important as it provides protection from the sun without darkening the area, including the adjacent interior.
- The square profile of the roof line provides a pleasing aesthetic as it conforms to the lineal nature of residential architecture.
